EN - ENGLISH

INDICATIONS FOR USE: The ASK® All Surface Kit is intended for use to increase adhesion to normal, dry, wet or dry enamel, amalgam, cast, stainless steel, porcelain, zirconia, composite restorations and acrylic temporary/polymers. **DIRECTIONS FOR USE:**

ENAMEL PREPARATION: Apply the surface to be bonded with 1st & Final® oil-free pumice. Rinse and dry. Apply the etching agent to the tooth. Allow 30 seconds for etching. Rinse and dry thoroughly. **APPLICATION OF ASSURE® PLUS LIGHT CURE PASTE:** Apply one coat of Assure® Plus to all prepared teeth. Lightly dry with air. Proceed with placement of bracket.

NOTE: A self etching primer may also be used in place of phosphoric acid etchant. If using a self etching primer, proceed with application of Assure® Plus. Apply one coat of Assure® Plus to all prepared teeth. Lightly dry with air. Proceed with placement of bracket.

Application of Assure® Plus with Chemical Cure Paste: Apply one coat of Assure® Plus to all prepared teeth. Lightly dry with air. Light cure for 10 seconds. Light cure for 10 seconds. Proceed with placement of bracket.

BONDING TO COMPOSITE, GOLD, AMALGAM, STAINLESS STEEL OR ACRYLIC TEMPORARIES: Apply one coat of Assure® Plus All Surface Bonding Resin and lightly dry. Light cure the Assure Plus first for 10 seconds. Proceed with placement of bracket.

BONDING TO PORCELAIN AND ZIRCONIA: Prophyl, rinse and dry. Sandblast, rinse and dry. Apply one coat of Porcelain Conditioner and allow to remain on surface for 2 minutes. Thoroughly dry. Apply one coat of Assure® Plus All Surface Bonding Resin. Light cure for 10 seconds. Proceed with placement of bracket.

BONDING TO DENTIN: Prophyl, rinse and dry the surface to be bonded. Acid etch for 30 seconds then rinse and dry. Do NOT DESICCATE. LEAVE MOIST. Apply 2 coats of the Assure® Plus All Surface Bonding Resin and lightly dry after the last coat. Light cure the Assure® Plus for 10 seconds. Proceed with application of paste and bracket.

② **Special Safety Notice:** Brush applicators are single use devices. It is required that a new brush applicator is used for each application.

③ **New brush tips are single use devices. Dispose of EtchMaster tips after each use. A new EtchMaster tip is required for each patient.**

Note: Avoid evaporation, replace cap between uses.

SAFETY GUIDELINES FOR THE ETCHMASTER - Read the Instructions and SDS carefully before using this device. The manufacturer, distributor, or retailer of this product exercises no control over the use of the ETCHMASTER product.

② This is a disposable device. Dispose after single patient use regardless of the remaining quantity of powder in tin.

DO NOT attempt to sterilize or reuse the tips. Mounting and pressurizing the device more than once will degrade device operation. Rubber dam must be used to protect adjacent teeth and soft tissue. Matrix band should be used to protect adjacent teeth during interproximal preparation.

Do not use alumina powder in place of matrix band. Alumina present in the treatment room during the procedure, namely the patient, assistant and dentist. For patient protection goggles and/or face (eyes and nose) covering with powder resistant polycarbonate eyewear should be worn. NEVER wear and/or reuse the device once it has run out of material. Safety Dispose after use.

Do not use oxygen or other flammable or toxic gases as propellant. Excessive air abrasion will erode most surfaces. Practice and experiment on typodonts before use on patients. Do not use the device on porcelain. Use these surfaces only to simulate both pre-cure and non-pre-cure alloys and porcelain.

USE INSTRUCTIONS: EtchMaster handle can be heat sterilized between uses. **CAUTION:** Do not point the EtchMaster nozzle towards your face or eyes. Always wear protective safety glasses when using the device. NEVER wear and/or reuse the device once it has run out of material. Safety Dispose after use.
